Workflow.com® to Sponsor Luncheons for the Institute for Medical Leadership

Cleveland – October 2, 2008 – Workflow.com has announced that it will sponsor luncheons at two special events for the Institute of Medical Leadership. The first will take place December 5-7 in San Diego, California. The second is scheduled for February 6 - 8, 2009 in Santa Monica, California.

The Chief of Staff Boot Camp was designed to provide new Chiefs of Staff with the information they need to succeed in their complex role. Led by The Institute for Medical Leadership's nationally recognized faculty, the three-day Boot Camp offers 18 hours of Category One CME credit for physicians and focuses on teaching the knowledge and tools necessary to work collaboratively with peers, hospital administration, and staff members.

In addition to honing executive-level leadership and communication skills, the course provides Chiefs with a working understanding of important topics such as JCAHO accreditation, credentialing and privileging, peer review, disruptive physicians, EMTALA & HIPAA reporting requirements, and hospital finances.

About Workflow.com

Based in Cleveland, OH, Workflow.com is an innovative software company that has created and supports complete solutions for ambulatory care, including electronic health records, practice management, document imaging, patient scheduling, messaging, billing services, and clinical workflow.

WorkflowEHR™ allows practices to use their own forms on a tablet PC, making patient encounters much more natural – without paper and without changing the way they are used to working. This solution enables physicians and their staff to capture clinical data with ease, streamline messaging, and eliminate paper files while automating workflow.

WorkflowPM™ is a Practice Management solution designed for Private Practices, Clinics, Ambulatory Care Facilities, and Billing Services. Its features include scheduling, patient accounting, claims processing, reporting, HL7 interface, open architecture, and billing services.
