Workflow.com[®] Achieves Surescripts Certification for Prescription Routing

Cleveland, Ohio – Workflow.com is pleased to announce that it is now Surescripts Certified for Prescription Routing. Surescripts gives healthcare providers secure, electronic access to prescription information that can save their patients' lives, improve efficiency and reduce the cost of healthcare for all.

The Surescripts Certification for Prescription Routing will allow Workflow.com software to accept new prescriptions as well as send and receive prescription renewal requests and authorizations. The result will be improved patient safety, less time on paperwork and re-keying, and "cleaner" scripts which require fewer callbacks for clarification. Software that has completed the Surescripts certification process are able to send and receive electronic messages in accordance with the industry standards and provide open choice for medication selection and dispensing location.

Surescripts is the result of a 2008 merger between the country's two leading health information networks: RxHub and SureScripts. Available during emergencies or routine care, the Surescripts network is used every day by thousands of physicians, physician assistants, nurse practitioners and other prescribers across all 50 states. The Surescripts network connects these prescribers to all of the nation's major chain pharmacies, the nation's leading payers and independent pharmacies nationwide.

About Workflow.com

Workflow.com is an innovative software company that has created and supports complete solutions for ambulatory care, including electronic health records (EHR), practice management (PM), document imaging, patient scheduling, messaging, billing services, and clinical workflow.

[workflowEHR™](#) allows practices to use their own forms on a tablet PC, making patient encounters much more natural – without paper and without changing the way they are used to working. This solution enables physicians and their staff to capture clinical data with ease, streamline messaging, and eliminate paper files while automating workflow.

[workflowPM™](#) is a Practice Management solution designed for Private Practices, Clinics, Ambulatory Care Facilities, and Billing Services. Its features include scheduling, patient accounting, claims processing, reporting, HL7 interface, open architecture, and billing services.
