Workflow.com® Completes Successful Implementation of Electronic Health Record at Carey Services

Marion, Indiana – Workflow.com, a leading provider of health information technology that dramatically improves the practice of medicine for both providers and patients, announced today that Carey Services successfully completed installation of its CCHIT certified EHR software.

Carey Services has been the community provider of services to persons with developmental disabilities in Grant and Blackford Counties for over half a century. Their mission, to “provide pathways toward self-sufficiency with personal satisfaction” is the foundation for the agency and for those who support the individuals it serves. Transition is one of several programs providing services to persons with disabilities or other barriers to self-sufficiency.

Workflow.com’s software solutions improve the delivery of safe, cost-effective, high-quality care by automating common tasks such as prescribing and refilling medications, ordering and viewing tests, and documenting care. In addition, WorkflowEHR™ is easy to deploy and easy to learn making it the ideal solution for organizations that include volunteers or student trainees.

About Workflow.com

workflow.com is an innovative software company that has created and supports complete solutions for ambulatory care, including electronic health records (EHR), practice management (PM), document imaging, patient scheduling, messaging, billing services and clinical workflow.

[workflowEHR](#) allows practices to use their own forms on a tablet PC, making patient encounters much more natural – without paper and without changing the way they are used to working. This solution enables physicians and their staff to capture clinical data with ease, streamline messaging, and eliminate paper files while automating workflow.

[workflowPM™](#) is a Practice Management solution designed for Private Practices, Clinics, Ambulatory Care Facilities, and Billing Services. Its features include scheduling, patient accounting, claims processing, reporting, HL7 interface, open architecture, and billing services.
